EDUCATION

Agentic AI and Robotics AI engineering

○ Governor initiative for agnetic ai

2024 - ongoing

PROFILE

I'm a Frontend Developer with a passion for AI. I enjoy building responsive, user-friendly interfaces using modern web technologies and integrating innovative AI solutions into my work. Specializing in Generative AI and Agentic AI, I strive to create applications that not only look great but also offer intelligent, dynamic features. I'm always learning and excited to explore how emerging AI technologies can enhance user experiences.

WORK EXPERIENCE

Ecommerce application

Link: https://robiz.vercel.app/

- Fully Functional Platform: Developed an end-to-end e-commerce site featuring CMS for product management and order processing.
- Responsive Design: Ensured seamless user experience across desktops, tablets, and mobile devices.
- Secure Authentication & Database Integration: Implemented robust user auth and managed data with a reliable database system.

Portfolio website

Link: https://portfolio-nextjs-two-tau.vercel.app/

- Showcase of Personal Brand: Developed a personal portfolio to highlight my skills, projects, and background.
- User-Friendly Navigation: Implemented an intuitive interface for smooth navigation across all sections.
- Responsive Design: Ensured a consistent experience across devices for better accessibility.

Hackathon Participations

Link:https://hackathon-three-delta.vercel.app/

- Innovative Web Application Development:
- Leveraged Next.js with SSR and App Router for optimal performance and routing, and styled the interface using Tailwind CSS for a modern, responsive design. Utilized Figma and Shadcn UI for crafting a user-friendly and visually appealing UI.
- Robust Functionality & State Management:
- Implemented centralized state management with Redux Toolkit and streamlined data flow. Integrated a headless CMS (Sanity) for product data, with form validation using Zod + React Hook Form and secure authentication via NextAuth.js. Managed user data with MongoDB.
- Enhanced User Experience & Advanced Features:
- Delivered smooth interactions with Swiper for scrolling and Framer Motion for dynamic animations. Incorporated payment processing with Stripe, shipping solutions with Shippo, and email confirmations using Nodemailer + Mailtrap. Augmented the project with a custom AI assistant through OpenAI + Gemini APIs, handled audio with Tone.js, and supported internationalization with Next intl.
